¹⁹ The letters *ao* in “paosterior” are connected together, as if *a* was written first and then *o* formed from its stem, without erasing the bow of the original *a*.

²⁰ This entry was written as if a continuation of the preceding gloss; this might explain why the lemma does not occur in the correct *ab*-order, and perhaps why it was omitted from Corpus.

²³ This entry occurs directly next to **Ep** O70 *occiput : hreacca* (**O70**) in the previous column of the manuscript, and thus might be a repetition of that entry; for the lemma, see **O93** above.

²⁴ There is a stray *l* after *oppansum* and before *uelum*, perhaps a false start at writing the abbreviation for *uel*, which the scribe misread from the beginning of *uelum*.

²⁵ The first *n* in *inscena* was modified from another letter.
